The Absolute Action Slim Light Bar is an exciting new addition to the Company's extensive range of display case lighting equipment, for retail or conservation applications.

A uniformly-spaced row of unlensed glass fibre heads deliver a well-distributed wash of light across the display area.

Ideally used in conjunction with a system of focusable lensed heads, the Light Bar complements the directed light beams by eliminating distracting shadow contrasts. Being a mere 20mm in diameter, the Light Bar occupies minimal space and can be secreted behind the most slender of structural frames.

All the benefits of a remote source lamp are preserved, with a feeder fibre of whatever length is appropriate being run to a light source in a convenient location for maintenance.

INSTALLATION DATA:

Tube Diameter:	20 mm
Lengths Available:	200 mm to 1700 mm
Beam Angle Degrees:	70°
Pitch between light:	20
Operating Temperature: (°c)	-20° - +80 °c
